DIVISION OF  
OIL GAS & MINING

Dear Tony,

Richard Saldana contacted me last fall (see enclosed letters) regarding a green quartzite flagstone deposit he located in the Rose Bud area. He worked for Utah Building Stone Supply last summer running a crew of Mexican laborers at the Bown's quarries. He became unhappy because of non payment of wages and has not collected everything due to this date. Bowns have a long history of not paying their just bills. The Mexican laborers were illegal and they did not get their full wages.

Today I explored the area that Richard has leased to determine its potential. The area is Northeast about 1/4 mile and across the wash from the Bown quarry workings that we visited last month.

In my opinion this is a totally unworkable quarry because of the following facts;

1. Steep Terrain, no access roads, major road building to access.
2. No previous disturbance, major costs involved to meet current state and federal regulatory requirements.
3. Little or no thin bedded stone and most of the deposit tilted at 90 degrees making quarrying extremely difficult and requiring major excavation to determine feasibility of a operation.
4. Color and quality of stone is undeterminable without major exploration and development.

You need to review the lease/claim right away and notify responsible parties before another area is needlessly dug up. Also I would expect that the Bowns illegal mess in this area would be cleaned up and restored this season. If you need more information please let me know.

Sincerely,

  
Gary Mullard  
President

Dear Gary:

Just a note to let you know that I have moved back to Salt Lake as I had anticipated. Although I don't have my own place yet, you can contact me at work or write my post office box. I am still interested in working out an agreement with you on my green quartzite claim and need to let you know that the State of Utah requires me to notify them 60 days prior to the commencement of any operations that might substantially disturb the ground.

I also want to thank you for your hospitality and graciousness in showing me your operation when I stopped in to see you.

Sincerely,

*Richard H. Saldana*

Attn: Gary Mullard

Dear Mr. Mullard:

I am in the process of contacting natural stone companies around the U.S. about purchasing the mineral rights I have to a "rare" green quartzite location.

Although I have only done a small amount of hand excavation, the site appears to have an unlimited amount of rock with most of the seams running between 1/2 inch and 1 1/2 inches in thickness. I have included a small sample for your perusal.

If after reviewing the sample, you should wish to contact me, my name, address and telephone number are listed below. Thank you for your time and consideration.

Sincerely,
